

OPEN DAY - SA.PI.SE. Field day

Wednesday the 2nd of September 2015 from 9am to 3pm

At Tenuta Castello, Sali Vercellese (VC)

SA.PI.SE. is glad to announce the organization of the Annual Field Day tour, totally dedicated to SA.PI.SE. rice seed and SA.PI.SE. rice varieties for the 2016 rice sowings.

The event will deal not only with rice seed, several technical updates on the rice sectors will be offered thanks to the presence of technical specialists of the following arguments:

- The **SA.PI.SE. rice varieties**: (Conventional, Clearfield® and Hybrid)
- The **Clearfield® Technology**: weed management (by BASF)
- Rice Water Weevil: Lumivia® seed treatment for its control (by DUPONT)
- Bakanae disease: Celest® seed treatment for its control (by SYNGENTA)
- The effect of Rice seed coating (by BAYER)
- The effect of RootRice® seed treatment on rice development (by EDYPRO biotechnology)
- The effect of SuperSeed® seed treatment for a fast rice germination (by KALOS and YARA Vita)
- The new frontiers of the Hybrid Rice cultivation (by RICETEC)
- The Fertilization of the Rice Field (by EUROCHEM Agro)
- The Integrated Rice Blast Management (by Province of Vercelli and University of Pavia)
- The new varieties birth (by SA.PI.SE.'s research team)

At the event will attend also:

JOHN DEERE: *Harvest combines and tractors for modern farming*
AGRIMACCHINE: *Rice dryers and storage*
SABATINO: *Equipments for rice farming*
ANGA: *National Young Farmers Association of Vercelli and Biella*
La Pista by Alberto and Elisabetta Galante.
Donatello Lorenzo: *The best of from Sapise pictures archive*

All the participants will be divided into 3 visiting groups that will follow a detailed route from the two SA.PI.SE. catalog field to all the expositor booths
