**Increases the production and quality
of the ALMOND TREE through
BIOTECHNOLOGY**

Treatment in Winter (before the swollen bud) **Foliar application**

The almond tree requires continued care of its vegetative mass.

This care begins with winter treatments to clean the vegetative mass when 100% leaf is fallen and for this aim copper products are used.

CUPRO-PLUS MAX

5 L. x 1000 L.

MELASTOP

1,5 L. x 1000 L.

If it is necessary to apply pesticide to control wood pests (“San José louse”).

This treatment is aimed to stimulate the emergence and pollen fertility unifying the formation of flowers and prevent diseases as *Antracnosis* and *Botrytis* in flowers.

Treatment in “pink button” Foliar application

AMINOPLUS

1,5 L. x 1000 L.

ALGATRON

2 L. x 1000 L.

BOTCAR

3 L. x 1000 L.

MELASTOP

1,5 L. x 1000 L.

EDYPRO
biotecnología

Radicular Application

COUPÉ REGENERACIÓN Plus 80 L. / ha.

It allows to have active, healthy cultivation soils with a great capacity for vegetative development.

Apply in a single irrigation and without mixing with fertilizer.

This moment is a very delicate time because a small drop of temperatures may cause a significant loss of fruits. Treatment of fruit set, floral initiation and differentiation.

Treatment of open flower

Foliar application

ENDOFOSTEC

4 L. x 1000 L.

HYDROCAL

3 L. x 1000 L.

EDYMAG

2,5 L. x 1000 L.

SIGNUM WG (check if it is still authorized)

MELASTOP

2 L. x 1000 L.

Large sized leaves which increase daily photosynthesis of the tree and allow a vital improvement of functioning of the crop are obtained with this treatment.

Treatment at 50% of the leaf's formation

Foliar application

MAX QUALITY

4 L. x 1000 L.

AMINOPLUS

1,5 L. x 1000 L.

ALGATRON

2 L. x 1000 L.

CENICIENTA

3 L. x 1000 L.

EDYMAG

2,5 L. x 1000 L.

MELASTOP

1,5 L. x 1000 L.

Radicular Stimulation

Radicular application

ORGANOVITAL PLUS

60 - 80 L. / ha.

Root stimulant that activates the tree to anticipate the development of sprouting and prevent aphids.

EDYPRO
biotecnologia

Treatment for Enlargement and Aphids in spring Foliar application

MAX QUALITY

4 L. x 1000 L.

ENDOFOSTEC

4 L. x 1000 L.

HYDROCAL

3 L. x 1000 L.

BOTCAR

3 L. x 1000 L.

SIGNUM WG (check if it is still authorized)

MELASTOP

1,5 L. x 1000 L.

EDYPRO
biotecnologia

Treatment for Psila and Molasses

Foliar application

DESECANTE EDYPRO

5 L. x 1000 L.

Stimulation Treatment

Radicular application

COUPÉ REGENERACIÓN Plus 80 L. / ha.

Its **prebiotic effect** reactivates the microbial fauna of the cultivation soil and allows to have active, healthy cultivation soils with a great capacity for vegetative development.

With this action we directly increase the enlargement capacity of the crop, achieving large fruits and high specific weight.

Apply in a single irrigation and without mixing with fertilizers.

EDYPRO
biotecnologia

Treatment for Enlargement (before the bone begins to harden) Foliar application

MAX QUALITY

4 L. x 1000 L.

HYDROCAL

3 L. x 1000 L.

EDYMAG

2,5 L. x 1000 L.

CENICIENTA

3 L. x 1000 L.

MELASTOP

1,5 L. x 1000 L.

Repeat at 15 days

EDYPRO
biotecnologia

Treatment Post-recollection. At the fall of leaves.

Foliar application

CUPRO-PLUS MAX

3 L. x 1000 L.

ALGATRON

2 L. x 1000 L.

MELASTOP

1,5 L. x 1000 L.
